EDUCATION

- 2006-2009 Postdoctoral Fellow in Interventional Neuroradiology
David Geffen School of Medicine at UCLA
- 2001-2006 PhD in Biomedical Engineering
University of California, Los Angeles, CA
- 2000-2001 MS in Mechanical and Aerospace Engineering
Cornell University, Ithaca, NY
- 1994-1999 BS in Agricultural Machinery Engineering
BS in Law
National Taiwan University, Taipei, Taiwan

PATENT

1. Lead inventor of *Volumetric Analysis of Multi-dimensional Images*; USA patent Ser.No.61/089,501; UC patent UC08-681-1
2. Lead inventor of *Volumetric Analysis of Multi-dimensional Images*; USA patent Ser.No.61/233,194; UC patent UC08-681-2
3. Lead inventor of *Apparatus and Methods for Surface Capturing and Volumetric Analysis of Multi-dimensional Images*; USA patent Ser.No.12/854,860; UC08-681-3
4. Lead inventor of *Apparatus and Methods for Surface Capturing and Volumetric Analysis of Multi-dimensional Images*; USA Patent No.8,472,685
5. Lead inventor of *Automated Comparison of 3D images* USA Patent Ser.No.62/040,137; UC2014-024-1-LA
6. Lead inventor of *Automated Comparison of 3D images* USA Patent Ser.No.62/207,974; UC2015-024-1-LA
7. Lead inventor of *Automated Comparison of 3D images* USA Patent Ser. No.15/242,111; UC2016-024-3-LA

HONORS AND SCHOLARSHIPS

- | | | |
|-----------|---------------------------------------------------------------------------|---------------------------------------------------------------------------|
| 2016 | Fellow of the American Heart Association | <i>American Heart Association, Stroke Council</i> |
| 2016 | Early Career Reviewer (ECR) | <i>Center for Scientific Review, National Institutes of Health, U.S.A</i> |
| 2016 | ATIP-Avenir Review Committee | <i>National Institute of Health and Medical Research, France</i> |
| 2016 | Chang Jiang Scholars Program Committee | <i>The Ministry of Education, China</i> |
| 2015 | Timothy P. Susco Chair of Research Award | <i>Brain Aneurysm Foundation</i> |
| 2015 | AAMC Early Career Women Faculty Professional Development (EWIM) Award | <i>Association of American Medical Colleges</i> |
| 2015 | Brain aneurysm medical research Award | <i>The Bee Foundation</i> |
| 2015 | AAMC Early Career Women Faculty Professional Development Award Nomination | <i>The David Geffen School of Medicine at UCLA</i> |
| 2014 | DGSOM Travel Award | <i>The David Geffen School of Medicine at UCLA</i> |
| 2014 | Cerebrovascular Research Award | <i>The Aneurysm and AVM Foundation</i> |
| 2014 | SIR Dr. Ernest J. Ring Academic Development Award | <i>Society of Interventional Radiology</i> |
| 2014 | Radiology Exploratory Research Award | <i>University of California, Los Angeles</i> |
| 2012 | Radiology Exploratory Research Award | <i>University of California, Los Angeles</i> |
| 2006 | Kiichi Sagawa Young Investigator Award (4 th place) | <i>Cardiovascular System Dynamics Society</i> |
| 2006 | Nico Westerhof Young Investigator Award Finalist | <i>Cardiovascular System Dynamics Society</i> |
| 2006 | ASLMS Travel Grant | <i>American Society for Laser Medicine and Surgery</i> |
| 2004 | AHA Cardiovascular Outreach Award | <i>American Heart Association</i> |
| 2004 | Heart Failure Society of America | <i>Heart Failure Society of America</i> |
| 2001-2006 | Graduate Student Fellowship | <i>University of California, Los Angeles</i> |
| 1995 | Presidential Award | <i>National Taiwan University, Taiwan</i> |

PROFESSIONAL ACTIVITIES

Committee, Emerging Information and Technology Association
 Member, American Heart Association/American Stroke Association
 Member, Radiological Society of North America
 Member, American Society of Neuroradiology
 Member, Society of Interventional Radiology

Reviewer, American Heart Association/ American Stroke Association
 Reviewer, American Journal of Neuroradiology
 Reviewer, IEEE Transactions on Biomedical Engineering
 Reviewer, Journal of Neuroscience Methods
 Reviewer, Journal of Medical & Biological Engineering & Computing
 Reviewer, Neurosurgery
 Reviewer, Stroke

RESEARCH EXPERIENCE AND EMPLOYMENT

2015– Present Associate Professor
 Division of Interventional Neuroradiology, Ronald Reagan UCLA Medical Center

2015- Present Associate Professor
 Department of Radiological Sciences, David Geffen School of Medicine at UCLA

2014- Present Faculty in Physics and Biology in Medicine Graduate Program
 David Geffen School of Medicine at UCLA

2014- Present Faculty in Joint Research Institute (JRI) in Science and Engineering
 University of California, Los Angeles

2011– Present Faculty in UCLA Center for Domain Specific Computing
 UCLA Henry Samueli School of Engineering and Applied Science

2010– Present Faculty in Cross-disciplinary Scholars in Science and Technology (CSST)
 University of California, Los Angeles

2009– 2015 Faculty in Biomedical Physics IDP Graduate Program
 David Geffen School of Medicine at UCLA

2009– Present Faculty in Medical School Short Term Training Program (STTP)
 David Geffen School of Medicine at UCLA

2009–2015 Assistant Professor
 Division of Interventional Neuroradiology, Ronald Reagan UCLA Medical Center

2009–2015 Assistant Professor
 Department of Radiological Sciences, David Geffen School of Medicine at UCLA

2006-2009 Postdoctoral Fellow
 Division of Interventional Neuroradiology, Dept. of Radiology, UCLA

2001-2006 Graduate Student Researcher
 Dept. of Biomedical Engineering, UCLA

2000-2001 Graduate Student Researcher
 Dept. of Mechanical and Aerospace Engineering, Cornell University, NY

Book Chapters

Smart Drug Delivery System. ISBN 978-953-51-4588-2. Chapter 12: Device Integrity of Drug-eluting Depot Stent for Smart Drug Delivery. H Hsiao, **A Chien**, B Huang, D Li, H Chen and C Ko. Feb 2016.

LECTURES AND PRESENTATIONS

1. "Multidisciplinary Approach to Clinical Management of Stroke and Aneurysm Disease", Biomedical Engineering Seminar, Hong Kong University of Science and Technology, Hong Kong, Oct 2016. (Invited talk)
2. "Blood Flow Analysis for TIPS Procedure", *Chinese Congress of Radiology*, Suzhou, China, October 2016. (Invited talk)
3. "Compared to ICA aneurysms-Posterior Communicating Artery Aneurysms Have Unique Hemodynamic and Morphologic Characteristics during Growth", *2016 Brain Aneurysm Foundation Research Symposium*, Atlanta, GA, September 2016.
4. "Vessel Wall Imaging for Assessment of Vascular Malformation and Stent Treatment", Laboratory of Molecular Imaging and Nanomedicine (LOMIN), National Institute of Biomedical Imaging and Bioengineering (NIBIB) Washington, DC, May 2016.
5. "Collaborative Research for Stroke Disease Study in Asia and UCLA", NIH Office of the Directors, National Institute of Biomedical Imaging and Bioengineering (NIBIB) Washington, DC, May 2016.
6. "Posterior Communicating Artery Aneurysms Exhibit Higher Growth Rate and Aspect Ratio vs. Other Growing Aneurysms", *The 54th American Society of Neuroradiology Annual Meeting*, Washington, DC, May 2016. (Invited lecture)
7. "Growing Aneurysms Show an Increase in Wall Shear Stress Over Time", *The 54th American Society of Neuroradiology Annual Meeting*, Washington, DC, May 2016. (Turbo talk)
8. "Distinct Morphological Changes Found in Longitudinal Comparison of Growing vs. Stable Aneurysms", *The 54th American Society of Neuroradiology Annual Meeting*, Washington, DC, May 2016. (Turbo talk)
9. "Cerebrovascular Disease - Risk Analysis to Assist Better Clinical Treatment for Brain Aneurysms" *The 12th Asian-Pacific Congress of Cardiovascular & Interventional Radiology (APCCVIR)*, Zuzhou, China, April 2016. (Invited lecture)
10. "Quantitative Aneurysm Flow Evaluation of Combined FD and Coil Treatment Shows Higher Flow Reduction during the Healing Process based on 2D DSA Images" *2016 International Stroke Conference*, Los Angeles, California, Feb 2016. (Moderated poster)
11. "Vessel Wall Imaging Demonstrates Aneurysm Wall Enhancement in Unruptured Posterior Communicating Artery Aneurysms with Oculomotor Nerve Palsy", *2016 International Stroke Conference*, Los Angeles, California, Feb 2016.
12. "Hemodynamic Differences Found Between Growing and Stable Aneurysms of Comparable Dome and Neck Sizes", *2016 International Stroke Conference*, Los Angeles, California, Feb 2016.
13. "Portal vein flow analysis to determine shunt size for TIPS procedure", *The 28th International Symposium on Endovascular Therapy*, Hollywood, Florida, Feb 2016.
14. "Wall Shear Stress Trends Differ for Small and Medium Growing Aneurysms", *The 28th International Symposium on Endovascular Therapy*, Hollywood, Florida, Feb 2016.
15. "The Role of 3D Imaging for Assessment, Follow-up, and Treatment Planning of Intracranial Cerebra", *101th Scientific Annual Meeting of Radiological Society of North America*, Chicago, IL, Nov 2015.
16. "Hemodynamic Analysis for Risk Assessment and Stratification of Intracranial Pathology", *101th Scientific Annual Meeting of Radiological Society of North America*, Chicago, IL, Nov 2015.

17. "Patient-specific Disease Analysis to Follow-up Brain Aneurysm Progress Single Center Experience", College of Computer Science, National Chiao Tung University, October 2015. (Invited lecture)
18. "Aneurysm growth and treatment analysis" Dept. of Radiology, Far Eastern Memorial Hospital, New Taipei City, Taiwan, October 2015. (Invited lecture)
19. "Stroke Risk Analysis for Early Detection and Aneurysm Assessment", *The 3rd annual meeting of Emerging Information and Technology*, Taipei, Taiwan, Oct 2015. (Invited lecture)
20. "Big Data Analytics, Data Science and Machine Learning: Challenges and Opportunities for Biomedical Research", *The 3rd annual meeting of Emerging Information and Technology*, Taipei, Taiwan, Oct 2015. (Invited lecture)
21. "Brain Aneurysm Research Current and Future", *The 2nd Annual Honey Bash*, The Bee Foundation, Philadelphia, Pennsylvania, September 2015. (Invited lecture)
22. "Longitudinal analysis of aneurysm 3D morphology changes", *9th Annual Brain Aneurysm Foundation Research Grant Awards Symposium*, Huston, Texas, September 2015. (Invited lecture)
23. "Medical Image Analysis using Clinical Angiogram to Help Treatment Planning", Department of Electronics and Information Engineering, Huazhong University of Science and Technology, May 2015. (Invited lecture)
24. "Vascular Flow Analysis for Real-time Interventional Procedures", Dept. of Interventional Radiology, Zhongda Hospital Southeast University, May 2015. (Invited lecture)
25. "Hemodynamic Studies for Arterial Stenting", Department of Bio-Industrial Mechatronics Engineering, National Taiwan University, Taipei, Taiwan, May 2015. (Invited lecture)
26. "Blood Flow Measurement for Personalized Interventional Procedure Treatment Planning", *The First Oriental International Conference of Interventional Radiology*, Shanghai, China, May, 2015. (Keynote lecture)
27. "Analysis of Hemodynamics and Vascular Morphology – Applications from Artery to Vein", *Radiology Research Seminar*, UCLA Faculty Center, University California, Los Angeles, May 2015.
28. Rapid quantification of blood flow and device-induced flow changes for during treatment. *The Aneurysm and AVM Awareness Walk*, San Francisco, California, May 2015. (Invited talk)
29. Quantification of Cerebral Blood Flow for Aneurysm and AVM, *The 10th Aneurysm and AVM annual meeting*. San Francisco, California, May 2015. (Invited lecture)
30. "Effectiveness of Flow Reduction is Related to Aneurysm Geometry based on Quantitative DSA Flow Analysis in 13 Flow Diverter-treated Aneurysms", *SIR 40th Annual Scientific Meeting*, Atlanta, Georgia. Feb 2015. (Invited lecture)
31. "Blood Flow Characteristics Changes Induced by Flow Diverting Stent in a Large Wide-neck Intracranial Aneurysm", *The 27th International Symposium on Endovascular Therapy*, Hollywood, Florida, Jan 2015. (Invited lecture)
32. "Quantitative Analysis of Flow Diverter Induced Blood Flow Reduction in Brain Aneurysm Treatment", *The 27th International Symposium on Endovascular Therapy*, Hollywood, Florida, Jan 2015. (Invited lecture)
33. "Ruptured Aneurysm Neck Shape and Size Relates to High Risk Aneurysmal Blood Flow", *The 27th International Symposium on Endovascular Therapy*, Hollywood, Florida, Jan 2015. (Invited lecture)
34. "Ruptured Aneurysms Tend to Have Prominent Blood Flow Changes at Aneurysm Neck", *2015 International Stroke Conference*, Nashville Tennessee, Feb 2015.
35. "Quantitative Analysis of the Blood Flow Reduction in Brain Aneurysms Treated by Flow Diverter Stents", *2015 International Stroke Conference*, Nashville Tennessee, Feb 2015.
36. "Measurement of Intracranial Aneurysm Growth", *2015 International Stroke Conference*, Nashville Tennessee, Feb 2015. (Moderated poster)

37. "Aneurysm and Vascular Disease Analysis Tools", Division of interventional Neuroradiology, Ronald Reagan UCLA Medical Center, Los Angeles, December 2014. (Lecture)
38. "Identifying Aneurysm Rupture Risks- High Risk Flow and Morphology Factors Visible before Rupture", Division of interventional Neuroradiology, Ronald Reagan UCLA Medical Center, Los Angeles, December 2014. (Lecture)
39. "Hemodynamic Analysis for longitudinally followed Aneurysms" Dept. of Medical Imaging, Far Eastern Memorial Hospital, New Taipei City, Taiwan, November 2014. (Invited lecture)
40. "Blood Flow Improvement by Stents with Biocompatible Material" *The Emerging Information and Technology Association- New Materials*, Tainan, Taiwan, November 2014, (Invited lecture)
41. "Blood Flow Changes due to Flow Diverting Stents", INTAI Technology Corp. Taizon, Taiwan, August 2014. (Invited lecture)
42. "Image-based Flow Analysis to Assess Brain Aneurysm Rupture Risk and Stroke", Dept. of Medical Imaging, Far Eastern Memorial Hospital, New Taipei City, Taiwan, August 2014. (Invited lecture)
43. "Blood Flow Analysis for Cerebral Vascular Disease" Dept. of Radiology, Taipei Veterans General Hospital, Taipei, Taiwan, August 2014. (Invited lecture)
44. "Characterization of Blood Vessel Tissue Properties", Dept. of Neurosurgery, the First Affiliated Hospital of Sun Yat-Sen University, Guangzhou, China, July 2014. (Invited lecture)
45. "2D Angiogram Blood Flow Analysis for Real-time Assessment of Flow Changes", Dept. of Neurosurgery, The First Affiliated Hospital of Sun Yat-Sen University, Guangzhou, China, July 2014. (Invited lecture)
46. "Image-based Analysis for Stroke Patients", Dept. of Radiology, Keck School of Medicine of USC, Los Angeles, July, 2014.
47. "Computer Models for Disease Analysis", Institute for Computer Vision and Imaging Biomarkers, University of California, Los Angeles, June 6, 2014. (Invited lecture)
48. "Prevention and Monitoring of Stroke based on Multi-modality Medical Images", *Workshop 3: Integrating Modalities and Scales in Life Science Imaging*, NSF Mathematical Biosciences Institute, Columbus, Ohio, March 2014. (Invited lecture)
49. "Parent Artery Curvature May Help Determine the Effectiveness of Flow Diverter Treatment", *2014 International Stroke Conference*, San Diego, California, February 2014.
50. "Natural History Simulation Models: Aneurysms Larger Than 9.5 mm and Aneurysms Growing Faster Than 0.36 mm/year Require Intense Clinical Care", *2014 International Stroke Conference*, CA, San Diego, California, February 2014.
51. "Prevention of Hemorrhagic Stroke—the Role of Science and Engineering", *The 3rd Young Investigator Conference, Emerging Information & Technology Conference —Leadership, Innovation, Growth*, Massachusetts Institute of Technology, Cambridge, Massachusetts, August 2013. (Invited lecture)
52. "Automatic Detection of Vascular Lesion Changes", University of California, Santa Barbara, Dept. of Electrical Computer Engineering, June 2013. (Invited lecture)
53. "Aneurysms Exhibit Morphological and Hemodynamic Changes in Progression towards Rupture", *American Society of Neuroradiology 51th Annual Meeting*, San Diego, California, May 2013. (Oral presentation)
54. "Follow-up of Large Intracranial Aneurysms Indicates Growth Frequency Varies According to Location and Size", *2013 International Stroke Conference*, Honolulu, Hawaii, February 2013. (Moderated Poster)
55. "Identifying Aneurysm Growth based on Imaging—a Minimal 0.8 mm Size Increase is the Optimal Threshold to Classify Growth", *2013 International Stroke Conference*, Honolulu, Hawaii, February 2013.
56. "Hemodynamic Differences Found in Ruptured and Unruptured Aneurysms - Quantitative Comparison of Cases from a Single Location", *2013 International Stroke Conference*, Honolulu, Hawaii, February 2013.

57. "The Growth of Small, Asymptomatic, Unruptured Intracranial Aneurysms with no History of SAH -Different Risk Factors Associated with Single and Multiple Aneurysms", *2013 International Stroke Conference*, Honolulu, Hawaii, February 2013.
58. "Image Diagnosis of Brain Aneurysm Growth in Different Patient Population", Biomedical Physics IDP, David Geffen School of Medicine at UCLA, Los Angeles, February 2013. (Invited lecture)
59. "Hemodynamic Analysis to Assess Brain Aneurysms Risk Factor", UCLA Medical Imaging Informatics, Los Angeles, June 2012. (Invited lecture)
60. "Computational Medicine for Cardiovascular Disease and Device Treatment", Department of Bio-Industrial Mechatronics Engineering, National Taiwan University, Taipei, Taiwan, January 2012. (Invited lecture)
61. "Computational hemodynamic analysis for brain aneurysms to investigate the mechanism of rupture for aneurysms in different size categories", *International Conference on Computational Biology and Bioinformatics*, Shanghai, China, October 2011.
62. "Hemodynamic Force Dyssynchrony Found in Cerebral Aneurysms—A Quantitative Patient-Specific Aneurysm Flow Analysis at Single Location", *American Society of Neuroradiology 49th Annual Meeting*, Seattle, Washington, June 2011. (Oral presentation)
63. "Computational Hemodynamic Analysis of Flow-Diverting Stents", Division of interventional Neuroradiology, Ronald Reagan UCLA Medical Center, Los Angeles, April 2011. (Lecture)
64. "Domain Specific Computing for Brain Aneurysm Hemodynamic Analysis", Center of Domain Specific Computing, Dept. of Computer Science, University of California, Los Angeles, March 2011. (Invited lecture)
65. "Innovation in Computational Technology for Medicine", The Business of Science Center, Dept. of Molecular & Medical Pharmacology, University of California, Los Angeles, March 2011. (Invited lecture)
66. "Patient-Specific Hemodynamic Analysis for Brain Aneurysms", Medical Imaging Informatics, Dept. of Radiological Sciences, October, 2010. (Invited lecture)
67. "Bio-fluid Mechanics in Human Disease", Biomedical Physics IDP, David Geffen School of Medicine at UCLA, Los Angeles, January 2010. (Invited lecture)
68. "Medical applications of image analysis", Dept. of Mathematics, University of California, Los Angeles, Nov 2009. (Invited lecture)
69. "Volumetric Analysis for Lesions", Dept. of Biomedical Physics, Thoracic Imaging Research, UCLA, Los Angeles, October 2009. (Invited lecture)
70. "Clinical Aneurysm Hemodynamic Analysis", Division of interventional Neuroradiology, Ronald Reagan UCLA Medical Center, Los Angeles, July 2009. (Lecture)
71. "Flow Analysis for Brain Aneurysms", Applied Mechanics, Department of Mechanical Engineering, Waseda University, Tokyo, Japan, April 2009. (Invited lecture)
72. "Computational Flow Analysis in Cerebral Vascular Diseases", Institute of Advanced Biomedical Sciences, Waseda University, Tokyo, Japan, April 2009. (Invited lecture)
73. "The Role of Computer Simulation for Understanding the Mechanism of Brain Aneurysm Rupture", Dept. of Neurosurgery, Jikei University School of Medicine, Tokyo, Japan, April 2009. (Invited lecture)
74. "Human Cardiac Wall Stress Analysis with Patient-specific Myocardial Material Properties", *7th International Conference on Modeling in Medicine and Biology*, New Forest, United Kingdom, September 2007. (Oral presentation)
75. "Lower Wall Shear Stress Distribution was Found in Unruptured Cerebral Aneurysms using Patient-Specific Computational Flow Analysis", *4th Annual Meeting of American Society of Interventional & Therapeutic Neuroradiology*, California, USA, August 2007. (Oral presentation)

76. "Patient-Specific Computational Flow Analysis of Cerebral Aneurysms at Single Location: Differences in Wall Shear Stress Distribution Found in Ruptured and Un-ruptured Cases", *2nd Symposium on Biomechanics in Cardiovascular Disease: Shear stress in Vascular Biology*, Rotterdam, the Netherlands, April 2007. (Oral presentation)
77. "Patient-specific Cardiac Dynamic Simulation", Division of Cardiovascular Diseases, University of Cincinnati, Cincinnati, Ohio, USA, October 2006. (Invited lecture)
78. "Human Cardiac Dynamic Deformation Analysis with *in vivo* Determination of Individualized Myocardial Material Properties", *17th Congress of the Cardiovascular System Dynamics Society*, Vaals, the Netherlands, September 2006. (Oral presentation —*Kiichi Sagawa Young Investigator Award 4th place*)
79. "Human Cardiac Dynamic Deformation Analysis with *in vivo* Determination of Individualized Myocardial Material Properties", *17th Congress of the Cardiovascular System Dynamics Society*, Vaals, the Netherlands, September 2006. (*Nico Westerhof Young Investigator Award Finalist*)
80. "Non-invasive Determination of Human Myocardial Wall Stress with *in vivo* Physiological Parameters", *15th US National Congress on Theoretical and Applied Mechanics*, Boulder, Colorado, USA, June 2006. (Oral presentation)
81. "Dynamic Simulation for Human Cardiovascular System", Yale University, Department of Anesthesiology, New Haven, Connecticut, USA, June 2006. (Invited lecture)
82. "Optimal Density and Locations of Laser Channels Predicted for Transmyocardial Laser Revascularization by a Three-dimensional Ventricular Simulation Model", *26th Annual Meeting of the American Society for Laser Medicine and Surgery*, Boston, Massachusetts, USA, April 2006. (Oral presentation, selected as a Hot Topic)
83. "Human Cardiac Modeling", University of California, Irvine, Department of Biomedical Engineering, USA, March 2006. (Invited lecture)
84. "Cardiac Mechanics: *in vivo* Analysis for Healthy and Diseased Hearts" Cedars-Sinai Medical Center, Department of Cardiology, Los Angeles, California, USA, February 2006. (Invited lecture)
85. "Non-invasive Determination of Human Myocardial Wall Stress with *in vivo* Physiological Parameters", *Heart Modeling: Image Acquisition, Segmentation, Modeling and Analysis*, Institute for Pure and Applied Mathematics, University of California, Los Angeles, USA, February 2006. (Invited lecture)
86. "Human Dynamic *in vivo* Myocardial Wall Stress based on tagged Magnetic Resonance Imaging", *33rd Annual Meeting & Scientific Sessions of the North American Society for Cardiac Imaging*, Amelia Island, Florida, USA, October 2005. (Oral presentation)
87. "Non-invasive Evaluation of 3-Dimensional Ventricular Wall Stress Changes throughout the Cardiac Cycle", *33rd Annual Meeting & Scientific Sessions of the North American Society for Cardiac Imaging*, Amelia Island, Florida, USA, October 2005. (Oral presentation)
88. "Cardiovascular Modeling from electrophysiology to dynamic simulation" UCLA Dept. of Radiology— Diagnostic Cardiovascular Radiology Lecture Series, California, USA September 2005. (Invited lecture)
89. "Self-powered Pacing Device for Cardiovascular Implants", *4th Annual Southern California Biomedical Engineering Student Symposium*, Los Angeles, California, USA, January 2005.
90. "Non-invasive Derivation of 3D Systolic Nonlinear Wall Stress in a Biventricular Model from tagged MRI", *7th International Conference on Medical Imaging Computing and Computer-Assisted Intervention*, Saint-Malo, France, September 2004.
91. "Nonuniform Increases in Regional Wall Stress Encircle Infarcted Myocardium: A Derivation Using Left Ventricular Simulation", *8th Annual Scientific Meeting of the Heart Failure Society of America*, Canada, September 2004.
92. "Micro/Nano Technology in Cardiology", Institute of Physics, Academia Sinica, Taipei, Taiwan, April 2004. (Invited lecture)
